

Special Event Announcement  
Saturday, July 8th, 2023  
3:30 PM to 1 AM

# Mt. Wilson Summer Sky Observation

Come experience an event like no other, on the largest telescope available for public viewing in the world!

Join us as we restart our OSSC/Mt. Wilson collaboration at the storied Mount Wilson Observatory high above Los Angeles, observing a variety of planets and constellations with the **100" Hooker Telescope, the largest telescope in the world prior to 1949.** This is the telescope with which Hubble and others made their stunning observations, changing how we see ourselves in the universe. We will be looking at Jupiter, and the Dark Rift of the Milky Way, planets and star formations of particular interest. This special event **is limited to 20 participants**, no children please. We will gather at the gates at Mt. Wilson at **3:30 PM for a tour**, and viewing will conclude at 1 AM. We will arrange a potluck dinner after the tour and prior to beginning our observation session. The Hooker Telescope is an unheated facility, so we recommend bringing a **warm jacket as evening temperatures will likely be in the 50's and possibly in the 40's.** Register online, prepaid only, no refunds.

**Saturday, July 8<sup>th</sup> 2023**

**Tour starts around 3:30; Observing starts around 6:30 PM.**

**NO LATE ARRIVALS!**

**PREPAID ONLY, NO REFUNDS!**

**Potluck dinner to be arranged**

**Cost: \$150 per person**

**Directions to Mt. Wilson Observatory to be provided to registrants**

**On-line Registration: [www.osscc.org](http://www.osscc.org) only.**

**For Questions,**

**Contact: Scott Rowe,  
OSSC Mt. Wilson Special Events Coordinator,  
[scott@rowetechnical.com](mailto:scott@rowetechnical.com), 949-735-9927**

**Please Register as soon as possible, this will be 1<sup>st</sup> registered, 1<sup>st</sup> reserved event. We expect this event to sell out very quickly!**
